| <u>Study &amp; Evaluation Scheme</u> |  |
|--------------------------------------|--|
| <u>SUMMARY</u>                       |  |
| <b>Institute Name</b>                | Teerthanker Kunthnath College of Education (TKCOE), Pakwara, Moradabad |
| <b>Programme</b>                     | B.Sc.-B.Ed.(Integrated)  |
| <b>Duration</b>                      | Four Years full time(Eight Semesters)                                  |
| <b>Medium</b>                        | English and Hindi  |
| <b>Minimum Required Attendance</b>   | 75%  |
| <u>Credits</u>                       |  |
| <b>Credits Required for Degree</b>   | 218  |

| <b>Assessment:</b>             |              |              |                 |                            |              |
|--------------------------------|--------------|--------------|-----------------|----------------------------|--------------|
| <b>Evaluation</b>              |              |              | <b>Internal</b> | <b>External</b>            | <b>Total</b> |
| <b>Theory</b>                  |              |              | 40              | 60                         | 100          |
| <b>Practical/SECs</b>          |              |              | 50              | 50                         | 100          |
| Class Test-1                   | Class Test-2 | Class Test-3 | Assignment(s)   | Attendance & Participation | Total        |
| <b>Best two out of three</b>   |              |              |                 |                            |              |
| 10                             | 10           | 10           | 10              | 10                         | 40           |
| <b>Duration of Examination</b> |              |              | <b>External</b> | <b>Internal</b>            |              |
|                                |              |              | 3 Hours         | 1.5 Hours                  |              |

*To qualify the course a student is required to secure a minimum of 45% marks in aggregate including the semester end examination and teacher's continuous evaluation.(i.e. both internal and external).A candidate who secures less than 45% of marks in a course shall be deemed to have failed in that course. The student should have at least 45% marks in aggregate to clear the semester.*

| <u>Question Paper Structure</u> |  |
|---------------------------------|--|
|                                 | <i>The Question paper shall have two sections- Section A and Section B. The examiner shall set questions specific to respective section. Section wise details are as under mentioned:</i>  |
| <b>I</b>                        | <i>Section A shall consist of short answer type questions (approx.50 words). This section will essentially assess COs related to lower order thinking skills (Remembering &amp; Understanding). It will contain five questions with at least one question from each unit with an internal choice having "or" option with optional question from the same unit. Each question shall have equal weightage of two marks and total weightage of this section shall be ten marks.</i>   |
| <b>II</b>                       | <i>Section B shall comprise Long answer type questions (approx. 350-400 words). This section shall specify the higher order thinking as well as lower order thinking skills (Analyzing, Applying, Evaluating &amp; creating or Remembering &amp; Understanding) to be assessed and mapped with the course outcomes stated. It shall contain five questions with at least one question from each unit with an internal choice having "or" option with optional question from the same unit. Each question shall have equal weightage of ten marks and total weightage of this section shall be fifty marks.</i> |

## Program Structure-B.Sc.-B.Ed. (Integrated)

### A. Introduction:

The four-year B.Sc. B.Ed. programme is designed to provide opportunities for students to extend as well as deepen their knowledge and understanding of teaching profession, and also develop research capacities leading to specialization at the secondary education. Dora Sami subject committee report on development of Model Curriculum Framework for Four-Year Integrated Teacher Education Programme was also taken into consideration. The framework is based on the NCTE regulations, 2014 for B.Sc. B.Ed. programme.

The four year integrated programme aims at integrating general studies comprising science (B.Sc. B.Ed.) and professional studies comprising foundations or education, pedagogy of school subjects, and practicum related to the tasks and functions of school teachers. This programme maintains a balance between theory and practice, and coherence and integration among its various components, representing a wide knowledge base for a secondary school teacher. The programme aims at preparing teachers for Upper Primary and Secondary stages of education.

The B.Sc. B.Ed. programmes will be of four academic years consisting of eight semesters including school based experiences and internship in teaching. Student teachers will, however, be permitted to complete the programme within a maximum period of six years from the date of admission to the programme. This course provides an opportunity for the students to pursue science along with education in 4 years, which also helps them save one year of the degree. The students who want to pursue their career in the field of teaching science and other fields can apply for this course which includes knowledge of teaching expertise and pedagogies. This course will also be a foundation for those who would like to specialized as a senior secondary teacher as desire to go for post-graduation.

The institute emphasis on the following courses *balanced with core and programme specific courses*: The curriculum of B.Sc.-B.Ed.(Int.) program emphasizes an intensive, flexible management dictation with 72 credits of core courses (all types), 72 credits of Discipline Specific Courses, 36 credits are allotted to ability enhancement courses (AECC), 20 credits of school internship projects, 08 credits are allotted for pedagogy elective, engagement with field are allotted 04 credit and enhancing professional capacities are allotted 06 credits. Total 218 credits are allotted for the B.Sc.-B.Ed. (Int.) degree.

Course handouts for students will be provided in every course. A course handout is a thorough teaching plan of a faculty taking up a course. It is a blueprint which will guide the students about the pedagogical tools being used at different stages of the syllabus coverage and more specifically the topic-wise complete plan of discourse, that is, how the faculty members treat each and every topic from the syllabus and what they want the student to do, as an extra effort, for creating an effective learning. It may be a case study, a role-play, a classroom exercise, an assignment- home or field, or anything else which is relevant and which can enhance their learning about that

particular concept or topic. Due to limited availability of time, most relevant topics will have this kind of method in course handout.

| <b>B.Sc.-B.Ed. (Int.) : Four-Year (8-Semester) CBCS Programme</b> |  |                           |                         |                        |              |
|---|--|---------------------------|-------------------------|------------------------|--------------|
| <b>Basic Structure: Distribution of Courses</b>                   |  |                           |                         |                        |              |
| Sr. N.  | Categories of Courses                        | Number of Courses Offered | Number of Courses Opted | Number of Credit Hours | Total Credit |
| 1   | Core Course (CC)                             | 21 Course                 | 21 Course               | 72                     | 72           |

| 3   | Program/Discipline Specific Course (DSC)     | 48 Course                 | 24 Course               | 72                     | 72           |
| 4   | Pedagogy Elective Courses (PEC)              | 03 Course                 | 02 Course               | 08                     | 08           |
| <b>Skill Enhancement Courses (SECs)</b>                           |  |                           |                         |                        |              |
| 5.1   | Enhancing Professional Capacities (EPC)      | 04 Course                 | 04 Course               | 06                     | 06           |
| 5.2   | Engagement with the field (EWF)              | 01 Course                 | 01 Course               | 04                     | 04           |
| 6   | Internship: School Internship (SI)           | 03 Course                 | 03 Course               | 20                     | 20           |
| <b>Total</b>  |  | <b>90</b>                 | <b>65</b>               | <b>218</b>             | <b>218</b>   |

Contact hours include work related to Lecture, Tutorial Practical and credit (LPC), where our institution will have flexibility to decide course wise requirements.

### **B. Choice Based Credit System (CBCS)**

Choice Based Credit System (CBCS) is a versatile and flexible option for each student to achieve his target number of credits as specified by the UGC and adopted by our University.

The following is the course module designed for the B.Sc.-B.Ed. (Int.) program:

**Core Course (CC):** Core courses of B.Sc.- B.Ed. (Int.) program will provide a holistic approach to basic science education, giving students an overview of the field, a basis to build and specialize upon. These core courses are the strong foundation to establish basic science knowledge and provide broad multi-disciplined knowledge can be studied further in depth during the elective phase.

The core courses will provide more practical-based knowledge, case-based lessons and collaborative learning models. It will train the students to analyze, decide, and lead-rather than merely know-while creating a common student experience that can foster deep understanding, develop decision-making ability and contribute to the basic education and community at large.

A wide range of core courses provides groundwork in the basic school education, Upper primary education and secondary education.

The integrated foundation is important for students because it will not only allow them to build upon existing skills, but they can also explore career options in a range of industries, and expand their understanding of various education fields.

**Ability Enhancement Compulsory Course (AECC):** As per the guidelines of Choice Based Credit System (CBCS) for all Universities, including the private Universities, the Ability Enhancement Compulsory Course (AECC) is a course designed to develop the ability of students in communication (especially English) and other related courses where they might find it difficult to communicate at a higher level in their prospective job at a later stage due to lack of practice and exposure in the language, etc. Students are motivated to learn the theories, fundamentals and tools of communication which can help them develop and sustain in the corporate environment and culture.

**Program/Discipline Specific Course (DSC):** The Discipline Specific Courses chosen to make students specialist or having specialized knowledge of a specific domain like marketing, human resource, etc. It will be covered in 6 semester or in 3 year of the program relevant to chosen disciplines of core courses of the program. The student will have to choose any one specialization out of the two specializations offered, i.e., PCM (Physics, Chemistry, Math's) and ZBC (Zoology, Botany, Chemistry).

**Open Elective Course (OEC):** Open Elective is an interdisciplinary additional subject that is compulsory in the fifth and Six semester of the program. Each student has to do two MOOC of minimum eight weeks each as an Open Electives. The students can choose MOOC Course from SWAYAM/ E-Pathshala/ NPTEL or any other online learning portal with the approval of the concerned authorities.

**Pedagogy Elective Course (PEC):** Pedagogy is the “art, science, or profession of teaching; especially: education.” This definition covers many aspects of teaching, but pedagogy really comes down to studying teaching methods. The pedagogy elective course chosen to make students specialist or having specialized knowledge of a specific domain like art, science and social etc. We offer 2 pedagogy elective course to choose from a list.

**Engage with the field (EWF) and Project:** Engagement also refers to a "willingness, need, desire and compulsion to participate in, and be successful in, the learning process promoting higher level thinking for enduring understanding." Engagement with the field is also a usefully ambiguous term for the complexity of 'engagement' beyond the fragmented domains of cognition, behavior, emotion or affect, and in doing so encompass the historically situated individual within their contextual variables (such as personal and familial circumstances) that at every moment influence how engaged an individual (or group) is in their learning.

**School Internship Course (SI):** An internship is a period of work experience offered by an organization for a limited period of time. It empowers you to perform your rules in your respective level, subject area and discipline as well as to prepare you for personal and professional advancement. It gives you the chance to work under a second teacher who shall serve as your mentor. Students are motivated to learn the theories, fundamentals and tools of communication which can help them develop and sustain in the corporate environment and culture.

**Indian Knowledge System (IKS):** With the new education policy-NEP 2020 focusing on Indian Knowledge Systems and Intelligence Traditions of India, this course introduces the learners to the rich and varied knowledge traditions of India from antiquity to the present. This also helps the learner to know and understand their own systems and traditions which are imperative for any real development and progress. Also it helps the learner to think independently and originally with Indian frameworks and models for solving the problems of present day. Two Courses BSCEI301 Contemporary India and Education and BSCEI 521/621 Pedagogy of Mathematics are related to Indian Knowledge System.

**Skill Enhancement Course (SECs):** Skill Enhancement Course) means a course that enables the students to enhance their practical skills and ability to pursue a vocation in their subject of specialization. Skill Enhancement Course means a course designed to provide value-based or skill-based knowledge and should contain both theory and lab/hands-on/training/fieldwork. The main purpose of these courses is to provide students with life-skills in the hands-on mode to increase their employability.

**Enhancing Professional Capacities (EPC):** “Professional development refers to activities to enhance professional career growth”. Such activities may include individual development, continuing education, and in service education, as well as curriculum writing, peer collaboration, study groups, and peer coaching or mentoring.

it difficult to communicate at a higher level in their prospective job at a later stage due to lack of practice and exposure in the language, etc. Students are motivated to learn specific tools of profession which can help them develop and sustain in the corporate environment and culture.

### C. Programme Outcomes (POs)

The learning and abilities or skills that a student would have developed by the end of Four-year B.Sc.-B.Ed. (Int.) programme:

|              |  |
|--------------|--|
| <b>PO -1</b> | <b>Critical Thinking:</b> Take informed actions after identifying the assumptions that frame our thinking and actions, checking out the degree to which these assumptions are accurate and valid, and looking at our ideas and decision (intellectual, organizational, and personal) from different perspective. |
| <b>PO -2</b> | <b>Effective Communication:</b> Speak, read, write and listen clearly in person and through electronic media in English and in one Indian language, and make meaning of the world by connecting people, ideas, books media and technology.   |
| <b>PO -3</b> | <b>Social Interaction:</b> Elicit views of others, mediate disagreements and help reach conclusions in group setting.  |
| <b>PO -4</b> | <b>Effective Citizenship:</b> Demonstrate empathetic social concern and equity centered national development, and the ability to act with an informed awareness of issues and participate in civic life through volunteering.  |
| <b>PO -5</b> | <b>Ethics:</b> Recognize different value system including your own, understand the moral dimensions of your decision, and accept responsibility for them.  |
| <b>PO -6</b> | <b>Environment and Sustainability:</b> Understand the issues of environmental contexts and sustainable development.  |
| <b>PO -7</b> | <b>Self-directed and Life-long Learning:</b> Acquire the ability to engage in independent and life-long learning in the broadest context socio-technological changes.  |

### D. Programme Specific Outcomes (PSOs)

The learning and abilities or skills that a student would have developed by the end of Four-year B.Sc.-B.Ed. (Int.) programme:

|                |   |
|----------------|---|
| <b>PSO – 1</b> | Understanding concepts, theories, methods and techniques of Teaching Learning process, Pedagogy, Assessment, School Management and Community Involvement. |
| <b>PSO – 2</b> | Applying the psychological principles and theories in identifying the abilities, traits and problems of students.   |
| <b>PSO – 3</b> | Applying the concepts of Physics, Chemistry and Mathematics.  |
| <b>PSO – 4</b> | Applying the concepts of Zoology and Botany.  |
| <b>PSO – 5</b> | Analyzing specific academic situations and selecting appropriate approaches, tools & techniques to deal with academic issues.                             |
| <b>PSO – 6</b> | Evaluating individual student’s learning requirement and designing specific strategy for the improvement.   |
| <b>PSO – 7</b> | Devising plans for administration of school, delivery of courses, assessment of learning and training of staff.   |
| <b>PSO – 8</b> | Developing the teaching skills relevant to employment opportunities.  |

**E. Pedagogy & Unique practices adopted:** “Pedagogy is the method and practice of teaching, especially for teaching an academic subject or theoretical concept”. In addition to conventional time-tested lecture method, the institute will **emphasize on experiential learning:**

**1. Role Play & Simulation :** Role-play and simulation are forms of experiential learning. Learners take on different roles, assuming a profile of a character or personality, and interact and participate in diverse and complex learning settings. Role-play and simulation function as learning tools for teams and groups or individuals as they "play" online or face-to-face. They alter the power ratios in teaching and learning relationships between students and educators, as students learn through their explorations and the viewpoints of the character or personality they are articulating in the environment. This student-centered space can enable learner-oriented assessment, where the design of the task is created for active student learning.

**2. Video Based Learning (VBL)&Learning through Movies (LTM):**These days technology has taken a front seat and classrooms are well equipped with equipment and gadgets. Video-based learning has become an indispensable part of learning. Similarly, students can learn various concepts through movies. In fact, many teachers give examples from movies during their discourses. Making students learn few important theoretical concepts through VBL & LTM is a good idea and method. The learning becomes really interesting and easy as videos add life to concepts and make the learning engaging and effective. Therefore, our institute is promoting VBL & LTM, wherever possible.

**3. Special Guest Lectures (SGL)&Extra Mural Lectures (EML):** Some topics/concepts need extra attention and efforts as they either may be high in difficulty level or requires experts from specific domain to make concepts clear for a better understanding from the perspective of the institution. Hence, to cater to the present needs of institution we organize such lectures, as part of lecture-series and invite prominent personalities from academia time to time to deliver their vital inputs and insights.

**4. Student Development Programs (SDP):** Harnessing and developing the right talent for the institutions an overall development of a student is required. Apart from the curriculum teaching various student development programs (training programs) relating to soft skills, interview skills, Advanced excel training etc. that may be required as per the need of the student and institutions, are conducted across the whole program. Participation in such programs is solicited through volunteering and consensus.

**5. Skill development programmes :** Establishing collaborations with various institution partners to deliver the programme on sharing basis. The specific courses are to be delivered by education experts to provide practice based insight to the students.

**6. Special assistance program for slow learners & fast learners:** To write the note how would you identify slow learners, develop the mechanism to correct knowledge gap. Terms of advance topics and learning challenges will be provided to the fast learners.

**7. Orientation programme :** Student orientation programme plays an important role in a student transition to a university life. We offer 14 days orientation programme that includes some visits to academic or historical places, motivational talk, extracurricular activities and games. Orientation programmes are aimed at familiarizing the students to an unknown campus environment, its faculties and infrastructure. It enables them to make essential connection with studies and develop network among other peers.

**8.Mentoring scheme :** Mentoring demonstrates organizational commitment to the individual's development, but is not as directive as other developmental approaches such as training courses. The mentor is effectively a person who is not directly involved with the mentee's job role but is backed by the organization to listen to, guide and advise the mentee, in full confidentiality.

**9.Career & personal counseling:** Career counseling is a specialization of personal counseling much like other specialty areas of counseling (i.e., school, family, rehabilitation centers, etc.), which implies a particular emphasis, population, or setting for its practice. Counseling is a process that assists individuals in gaining helpful information about themselves, others, and the world around them as they solve problem or make decisions to improve their quality of life.

**10.Competitive exam preparation:** Competitive exams will enhance the skill of understanding of the application of concepts, which is required in a broader context when we appear for exams. We offer trial of many competitive exams such as TET, CTET and TGT during the semester.

**11.Extracurricular Activities:** organization & participation in extracurricular activities will be mandatory to help students develop confidence & face audience with care.

| <b>CO1.</b>                     | Understanding the basic concepts and principles of mechanics.  |                   |
| <b>CO2.</b>                     | Applying laws of motion, elasticity and forces in different physical experiments.  |                   |
| <b>CO3.</b>                     | Analyzing the motion of objects in the context of linear, gravitational and central forces.  |                   |
| <b>Course Content:</b>          |  |                   |
| <b>Unit-1:</b>                  | Conservation of Energy and Linear Momentum Mechanics of a particle, work-energy theorem. Conservative and non-conservative forces and their examples. Conservation of energy as negative gradient of potential energy. Center of mass of a system of particles. Conservation of linear momentum and energy. Systems of variable mass, single and multistage rockets.   | <b>12 Hours</b>   |
| <b>Unit-2:</b>                  | Rotational Dynamics Rigid body motion. Rotation motion, torque and angular momentum. Moment of inertia and its calculations for disc, cylinder, spherical shell and solid sphere, Body rolling down on an inclined plane.  | <b>12 Hours</b>   |
| <b>Unit-3:</b>                  | Motion under Central Forces Concept of central force. Kepler's laws of planetary motion. Gravitational law, Gravitational Potential and fields due to spherical shell and solid sphere. Gravitational potential energy and escape velocity. Two particle central force problem and reduced mass  | <b>10 Hours</b>   |
| <b>Unit-4:</b>                  | Elasticity, small deformations, Hooke's law, Elastic constants and relation among them. Beam supported at the ends, cantilever.  | <b>10 Hours</b>   |
| <b>Unit-5:</b>                  | Streamline and turbulent flow, equation of continuity, viscosity, Poiseuille's law critical velocity, Reynolds's number. Surface tension and surface energy, pressure on a curved liquid surface.  | <b>10 Hours</b>   |
| <b>Text Books:</b>              | 1. An introduction to mechanics, D. Kleppner, R.J. Kolenkow, McGraw-Hill.  |                   |

**Course Outcomes:** At the end of this course, the students will be-

|             |  |
|-------------|--|
| <b>CO1.</b> | Applying the concept of moment of inertia, elastic constant and viscosity of the liquid to different applications.       |
| <b>CO2.</b> | Analyzing the applications and working of moment of inertia and concept of elasticity in different physical experiments. |

**Course Content:**

**LIST OF EXPERIMENTS**

**Note: Select any ten experiments from the following list**

1. To determine length, radius of circular body by using screw gauge and Vernier calipers.
2. To determine modulus of rigidity of a wire by Maxwell's needle.
3. To determine moment of inertia of an irregular body by inertia table.
4. To determine Elastic constant of a wire by Searl's method.
5. To determine Moment of inertia of a Flywheel.
6. To determine Young's Modulus in case of Uniform bending using Scale, telescope and optic lever.
7. To determine Young's Modulus in case of Cantilever using Pin and Microscope
8. To determine Modulus of Rigidity by using Torsion pendulum.
9. To determine Viscosity by the Capillary flow (Radius using Mercury pellet).
10. To determine Surface tension by using Capillary rise (Radius using Vernier microscope).
11. To verify Bernoulli's theorem.
12. To determine viscosity by Poiseuille's method.

**Evaluation Scheme of Practical Examination:**

**Internal Evaluation (50 marks)**

Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

**Evaluation scheme:**

| PRACTICAL PERFORMANCE & VIVA DURING THE SEMESTER (35 MARKS) |                      |                       |                 | ON THE DAY OF EXAM (15 MARKS) |                 | TOTAL               |
|---|----------------------|-----------------------|-----------------|-------------------------------|-----------------|---------------------|

|-------------|---|
| <b>CO3.</b> | Applying uses of titrations in pharma industry. |
|-------------|---|

**Course Content:**

## LIST OF EXPERIMENTS

### Inorganic

Analysis of simple salt containing an anion and cations

Anion ---  $\text{CO}_3^{-2}$ ,  $\text{SO}_4^{-2}$ ,  $\text{Cl}^-$ ,  $\text{Br}^-$ ,  $\text{CH}_3\text{COO}^-$ ,  $\text{NO}_3^-$ ,  $\text{BO}_3^{-3}$ ,  $\text{PO}_4^{-3}$ .

Cation – Lead, Copper, Iron, Aluminium, Zinc Nickel, Calcium, Potassium, &  $\text{NH}_4^+$

### Organic Functional Gr. Reaction (At Least 4)

- Alcohol, Phenols, Aldehydes, ketones Clones, Carboxylic acids & Amides.

### Titrimetric Analysis.

- Determination of Fe (II) using  $\text{KMnO}_4$  with Oxalic Acid as Primary Acid Standard.
- Determination of CU (II) using  $\text{Na}_2\text{S}_2\text{O}_3$  with  $\text{K}_2\text{Cr}_2\text{O}_7$  Acid as Primary Standard .

### **Evaluation Scheme of Practical Examination:**

#### **Internal Evaluation (50 marks)**

Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

#### **Evaluation scheme:**

|             |  |
|-------------|--|
| <b>CO2.</b> | Explaining plant diseases, causal organisms and their control measures |
|-------------|--|

**Course Content:**

**LIST OF EXPERIMENTS**

1. Microscopic preparations and study of the following algal material: Nostoc, Oscillatoria, Chlamydomonas, Volvox, Coleochaete, Oedogonium, Vaucheria, Chara, Ectocarpus Sargassum and Polysiphonia
2. Staining of different types of Bacteria
3. Study of some locally available plant diseases caused by Viruses. Mycoplasma, Bacteria and Fungi in field/laboratory. TMV, Little leaf of Brinjal. Citrus canker, Green ear disease of Bajra.
4. *Rhizopus* and *Penicillium*: Asexual stage from temporary mounts and sexual structures through permanent slides.
5. Lichens: Study of growth forms of lichens (crustose, foliose and fruticose)
6. *Agaricus*: Specimens of button stage and full grown mushroom; Sectioning of gills of *Agaricus*.

**Evaluation Scheme of Practical Examination:**

**Internal Evaluation (50 marks)**

Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

|                         |   |
|-------------------------|---|
| <b>Course Outcomes:</b> | <b>At the end of this course, the students will be-</b>                           |
| <b>CO1.</b>             | Understanding the structure of lower invertebrates.                               |
| <b>CO2.</b>             | Recognizing information of specimen collection, slide preparation and microscopy. |
| <b>CO3.</b>             | Setup the permanent mounting of external structure of lower invertebrates         |
| <b>CO4.</b>             | Analyzing the structure of TS/LS of organs & developmental stages                 |

**Course Content:**

**LIST OF EXPERIMENTS** General survey of Invertebrate (Spot & Slides)

(A) **Protozoa:** - Entamoeba, Polystomella, Monocystis, Euglena, Noctiluca, Leishmania, Nyctotherus, Paramecium, Vorticella.

**Porifera:** Sycon, Hyalonema, Euplectella, Spongilla and Euspongia. **Coelenterate:** Obelia colony (polyp & medusa) Physalia, Porpita, Aurelia, Rhizostoma, Alcyonium, Corallium, Gorgonia, Pennatulula, Madrepora.

**Platyhelminthes:** Dugesia, Fasciola, Taenia, Schistosoma. **Nematode:** Filaria, Dracunculus, Wuchereria, Enterobius

**Annelida:** - Nereis (Heroneries with parapodia) Aphrodite, Arenicola, Pontobdella, Hirudinaria, Peripatus.

(B) Study of TS/LS of organs & developmental stages.

(i) **Porifera:** - T.S. of Sycon. (ii) **Coelenterata:** Planula larva of jelly fish. (iii) **Platyhelminthes:** T.S of Fasciola, scolex of Taenia, mature & gravid segment of Taenia, Hexacanth, bladderworm & cysticercus stage of Taenia, miracidium, sporocyst, redia, cercaria larva of Fasciola. (iv) **Annelida:** T.S through different region of leach.

(C) Dissection Through chart / model / Photograph / CD. – Hirudinaria – Morphology, general anatomy, digestion, nervous & excretory and reproductive system.

Earthworm – Anatomy, morphology, digestive and nervous system.

(D) Mounting- (Permanent)

Protozoa – Euglena, Paramecium, Polystomella

**Porifera:** Spicules, fibres, gemmule

**Coelenterata:** Obelia medusa

**Platyhelminthes:** – Taenia (proglotid) **Annelida:** – Nereis (parapodia)

**Evaluation Scheme of Practical Examination:**

**Internal Evaluation (50 marks)**

Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

**Evaluation scheme:**

| PRACTICAL PERFORMANCE & VIVA DURING THE SEMESTER (35 MARKS) |                      |                       |                 | ON THE DAY OF EXAM (15 MARKS) |                 | TOTAL               |
|---|----------------------|-----------------------|-----------------|-------------------------------|-----------------|---------------------|
| EXPERIMENT (05 MARKS)                                       | FILE WORK (10 MARKS) | ATTENDANCE (10 MARKS) | VIVA (10 MARKS) | EXPERIMENT (05 MARKS)         | VIVA (10 MARKS) | INTERNAL (50 MARKS) |

**External Evaluation (50 marks)**

The external evaluation would also be done by the external Examiner based on the experiment conducted during the examination.

| Experiment (20 MARKS) | File work (10 MARKS) | Viva (20 MARKS) | Total (50 MARKS) |
|-----------------------|----------------------|-----------------|------------------|
|-----------------------|----------------------|-----------------|------------------|

## Evaluation Scheme

| Internal Evaluation  |   |                          | External Evaluation  |   | Total Marks |
|--|---|--------------------------|--|---|-------------|
| 40 Marks   |   |                          | 60 Marks   |   | 100         |
| 20 Marks<br>(Best 2 out of Three<br>CTs)<br>(From Unit-II, IV & V) | 10 Marks<br>(Oral Assignments)<br>(From Unit I & III) | 10 Marks<br>(Attendance) | 40 Marks<br>(External Written Examination)<br>(From Unit II, IV & V) | 20 Marks<br>(External Viva)*<br>(From Unit - I & III) |             |

### \*Parameters of External Viva

| Content  | Body Language | Confidence | Question Responsiveness | TOTAL    |
|----------|---------------|------------|-------------------------|----------|
| 05 Marks | 05 Marks      | 05 Marks   | 05 Marks                | 20 Marks |

*Note: External Viva will be conducted by 2-member committee comprising*

*a) One Faculty teaching the class*

*b) One examiner nominated by University Examination cell.*

*Each member will evaluate on a scale of 20 marks and the average of two would be the 20 marks obtained by the students.*

| <b>Course Code:</b><br>BSCEI204 | Discipline Specific Courses<br><b>B.Sc.-B.Ed.(Int.) Semester-II</b><br><b>ELECTRICITY AND MAGNETISM</b>  | L-4<br>P-0<br>C-4 |
| <b>Course Outcomes:</b>         | <b>At the end of this course, the students will be-</b>  |                   |
| <b>CO1.</b>                     | Understanding the concepts of electric circuits, electric field, magnetic field and electro magnetic induction.  |                   |
| <b>CO2.</b>                     | Explaining various laws and theorems of electric field, magnetic field and electro magnetic induction.   |                   |
| <b>Course Content:</b>          |  |                   |
| <b>Unit-1:</b>                  | Electric Circuits AC Circuits: - Complex Reactance and Impedance. Series LCR Circuit: Resonance, Power Dissipation, Quality Factor and Band Width; Parallel LCR Circuit; Network Theorems: Thevenin theorem, Norton theorem, Superposition theorem, Reciprocity theorem, and Maximum Power Transfer theorem  | <b>10 Hours</b>   |
| <b>Unit-2:</b>                  | <b>Electric Field:</b> Electric Field and Lines. Electric Field E due to a Ring of Charge. Electric Flux. Gauss's law. Gauss's law in Differential form. Applications of Gauss's Law: E due to an Infinite Line of Charge, a Charged Cylindrical Conductor, an Infinite Sheet of Charge and Two Parallel Charged Sheets,   | <b>12 Hours</b>   |
| <b>Unit-3:</b>                  | <b>Dielectric Properties of Matter</b><br><b>Dielectrics:-</b> Electric Field in Matter. Dielectric Constant. Parallel Plate Capacitor with a Dielectric. Polarization, Polarization Charges and Polarization Vector. Electric Susceptibility. Gauss's law in Dielectrics. Displacement vector D. Relations between the three Electric Vectors.  | <b>10 Hours</b>   |
| <b>Unit-4:</b>                  | Magnetic Field Magnetic Effect of Currents:- Magnetic Field B. Magnetic Force between Current Elements and Definition of B. Magnetic Flux. Biot-Savart's Law, Magnetic Dipole and its Dipole Moment Ampere's Circuital Law Gauss's law of magnetism. Relative Permeability of a Material. Magnetic Susceptibility. B-H Curve and Energy Loss in Hysteresis.  | <b>10 Hours</b>   |
| <b>Unit-5:</b>                  | Electromagnetic induction:-Faraday's law (Differential and Integral forms). Lenz's Law. Self and Mutual Induction. Energy stored in a Magnetic Field Ballistic Galvanometer Potential Energy of a Current Loop. Ballistic Galvanometer: Current and Charge sensitivity & Damping.  | <b>10 Hours</b>   |
| <b>Text Books:</b>              | 1. Electricity and Magnetism By Edward M. Purcell (McGraw-Hill Education, 1986)  |                   |

| <b>Course Outcomes:</b>         | <b>At the end of this course, the students will be-</b>   |                   |
| <b>CO1.</b>                     | Understanding the concepts of Inorganic Chemistry.  |                   |
| <b>CO2.</b>                     | Explaining the atomic structures and properties & periodicity of elements.  |                   |
| <b>CO3.</b>                     | Applying the periodic property of element to find out their position in periodic table.   |                   |
| <b>Course Content:</b>          |   |                   |
| <b>Unit-1:</b>                  | <b>Atomic Structure:</b> Bohr's theory, its limitations and atomic spectrum of hydrogen atom. Wave mechanics: de Broglie equation, Heisenberg's uncertainty principle and its significance, Schrodinger's wave equation, significance of $\psi$ and $\psi^2$ . Quantum numbers and their significance. Shapes of <i>s</i> , <i>p</i> , <i>d</i> and <i>f</i> orbitals.  | <b>10 Hours</b>   |
| <b>Unit-2:</b>                  | Pauli's exclusion principle, Hund's rule of maximum multiplicity, Aufbau's principle and its limitations, Variation of orbital energy with atomic number.   | <b>12 Hours</b>   |
| <b>Unit-3:</b>                  | <b>Classification of Elements based on their electronics structure</b><br>The long form of periodic table <i>s</i> , <i>p</i> , <i>d</i> , <i>f</i> block elements. Their position in periodic table and general properties related to their electronic structures.   | <b>10 Hours</b>   |
| <b>Unit-4:</b>                  | <b>Periodicity of Elements</b><br>Detailed discussion of the following properties of the elements, with reference to <i>s</i> & <i>p</i> -block.<br>(a) Effective nuclear charge, shielding or screening effect, Slater rules, variation of effective nuclear charge in periodic table.<br>(b) Atomic radii (Vander Waals)<br>(c) Ionic and crystal radii.<br>(d) Covalent radii (octahedral and tetrahedral)<br>(e) Ionization enthalpy, Successive ionization enthalpies and factors affecting ionization energy. Applications of ionization enthalpy.<br>(g) Electro negativity, Pauling's/ Mullikan's/ Electro negativity scales.   | <b>12 Hours</b>   |
| <b>Unit-5:</b>                  | Chemistry of Hydrogen, Hydrogen peroxide including manufacturing and structure, Heavy Hydrogen, Heavy water, ortho and Para Hydrogen. Hardness of water, removal of hardness, estimation of hardness of water.  | <b>08 Hours</b>   |
| <b>Text Books:</b>              | 1. Inorganic Chemistry Gurtu & Khera Pragati Prakashan.   |                   |

|-------------------------|--|
| <b>Course Outcomes:</b> | <b>At the end of this course, the students will be-</b>  |
| <b>CO1.</b>             | Applying elementary ideas of electricity and magnetism to determine current, resistance and galvanometer sensitivity.              |
| <b>CO2.</b>             | Analyzing the applications and working of Ballistic Galvanometer, electromagnetic induction, network theorem, Hysteresis loop etc. |

**Course Content:**

**LIST OF EXPERIMENTS**

**Note : Select any ten experiments from the following list**

1. Verify network theorem (i) Superposition Theorem (ii) Thevenin Theorem (iii) Norton Theorem.
2. Use multi meter for measuring (a) Resistance (b) AC and DC Voltage (c) DC current.
3. Calibration of ammeter by Potentiometer.
4. Calibration of Voltmeter by Potentiometer.
5. To determine a Low Resistance by Carey Foster's Bridge.
6. To determine resistance of galvanometer by Kelvin's method.
7. To determine the (a) Charge Sensitivity and (b) Current Sensitivity of a B.G.
8. To plot graph showing the variation of magnetic field with distance along the axis of circular coil.
9. To determine internal resistance of a leclanche cell by Mance's method using post office Box.
10. To determine Self Inductance of a Coil by Rayleigh's Method.
11. Conversion of Galvanometer in ammeter of given range.
12. To verify Ohm's law in electricity.

**Evaluation Scheme of Practical Examination:**

**Internal Evaluation (50 marks)**

Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

**Evaluation scheme:**

| PRACTICAL PERFORMANCE & VIVA DURING THE SEMESTER (35 MARKS) |                      |                       |                 | ON THE DAY OF EXAM (15 MARKS) |                 | TOTAL               |
|---|----------------------|-----------------------|-----------------|-------------------------------|-----------------|---------------------|
| EXPERIMENT (05 MARKS)                                       | FILE WORK (10 MARKS) | ATTENDANCE (10 MARKS) | VIVA (10 MARKS) | EXPERIMENT (05 MARKS)         | VIVA (10 MARKS) | INTERNAL (50 MARKS) |

**External Evaluation (50 marks)**

The external evaluation would also be done by the external Examiner based on the experiment conducted during the examination.

| Experiment (20 MARKS) | File work (10 MARKS) | Viva (20 MARKS) | Total (50 MARKS) |
|-----------------------|----------------------|-----------------|------------------|
|-----------------------|----------------------|-----------------|------------------|

|                                 |   |                   |

|-------------------------|--|
| <b>Course Outcomes:</b> | <b>At the end of this course, the students will be-</b>                                |
| <b>CO1.</b>             | Analyzing the concentration of oxidizing agents in water samples in ecological studies |
| <b>CO2.</b>             | Applying the process of aromatic nitration in industrial chemistry.                    |

**Course Content:**

**LIST OF EXPERIMENTS**

1. Estimation of Cu (II) and  $K_2Cr_2O_7$  Using sodium thiosulphate solution (Iodometrically).
2. Estimation of available chlorine in bleaching powder iodometrically.
3. Preparation of Aluminium Potassium sulphate  $KAl(SO_4)_2 \cdot 12H_2O$  (Potash alum) or Chrome alum.
4. Acetylation of one of the following compounds: amines ( aniline, o-,m-,p- toluidines) and phenols ( $\beta$ -naphthol, salicylic acid)
5. Benzoylation of one of the following compounds: amines (aniline, o-,m-,p- toluidines) and phenols ( $\beta$ -naphthol, resorcinol) by Schotten- Baumann reaction
6. Nitration of one the following compounds: nitrobenzene, chlorobenzene, bromobenzene

**Evaluation Scheme of Practical Examination:**

|-------------------------|---|

|             |  |
|-------------|--|
| <b>CO1.</b> | Demonstrate the general characters, morphological and anatomical features of pteridophytes through specimens and slides. |
|-------------|--|

|             |  |
|-------------|--|
| <b>CO2.</b> | Analyzing the evolution of bryophytes, pteridophytes and gymnosperms on earth. |
|-------------|--|

**Course Content:**

**LIST OF EXPERIMENTS**

1. Study of External morphology and microscopic preparations of following bryophytes :Riccia, Marchantia, Anthoceros, Sphagnum and Polytrichum.
2. Microscopic temporary, double stained preparations and study of stem/cone/sporocarp of Lycopodium, Selaginella, Equisetum, Adiantum and Marsilea.
3. Study of External morphology and microscopic preparations of following gymnosperm: Cycas, Pinus and Ephedra.

**Evaluation Scheme of Practical Examination:**

**Internal Evaluation (50 marks)**

| <b>Course Outcomes:</b> | <b>At the end of this course, the students will be-</b>   |
| <b>CO1.</b>             | Explaining the general characters, morphological and anatomical features of higher invertebrates. |
| <b>CO2.</b>             | Applying knowledge of Mitosis and Meiosis by preparation of slides.                               |
| <b>CO3.</b>             | Analyzing the structure of Cell, Cell division and chromosome with slides.                        |

**Course Content:**

**LIST OF EXPERIMENTS**

**Observation of the following slides / spotters / models**

**Arthropoda:** *Palaemon, Lepas, Crab, Lobster, Squilla, Balanus, Apis, Lepisma, Apis, Limulus, Scolopendra, Periplaneta.*

**Mollusca:** *Lamellidense, Pila, Chiton, Teredo, Doris, Aplysia, Detalium, Nautilus, Sepia.*

**Echinodermata:** *Pentaceros, Echinis, Ophiothrix, Holothuria, Antidon.*

**Slides:**

Mouth parts of Anopheles (male and female), Culex (male and female), Cyclops, Dephnia, Zoea larva.  
Cell structure, Cell division, chromosome.

**Activity:**

Preparation of onion root tip for the stages of mitosis.

**Rexene Charts**

1. Prawn nervous system.
2. Prawn digestive system.
3. *Pila* nervous system.
4. *Unio* nervous system.
5. Starfish water vascular system.
6. Anatomy of *Pheritima*.

**Evaluation Scheme of Practical Examination:**

| <u>Course Code:</u><br>BSCEI302 | <b>Core Course</b><br><b>B.Sc.-B.Ed.(Int.) Semester-III</b><br><b>ORGANIC CHEMISTRY</b>   | L-4<br>P-0<br>C-4 |
|---------------------------------|---|-------------------|
| <b>Course Outcomes:</b>         | <b>At the end of this course, the students will be-</b>   |                   |
| <b>CO1.</b>                     | Understanding the concepts of Organic Chemistry.  |                   |
| <b>CO2.</b>                     | Applying the concept of Organic Chemistry to find hybridisation and shapes of molecules.  |                   |
| <b>CO3.</b>                     | Analysing the various chemical reactions and their mechanism  |                   |
| <b>Course Content:</b>          |   |                   |
| <b>Unit-1:</b>                  | <b>Basics of Organic Chemistry</b> Organic Compounds: Classification, and Nomenclature, Hybridization, Shapes of molecules, Influence of hybridization on bond properties. Electronic Displacements: Inductive, electromeric, resonance and mesomeric effects, hyperconjugation and their applications; Dipole moment. Homolytic and Heterolytic fission with suitable examples. Electrophiles and Nucleophiles; Nucleophilicity and basicity; Types, shape and their relative stability of Carbonations, Carbanions, Free radicals and Carbenes. Introduction to types of organic reactions and their mechanism: Addition, Elimination and Substitution reactions.       | <b>12 Hours</b>   |
| <b>Unit-2:</b>                  | <b>Stereo chemistry:</b> Fischer Projection, Newmann and Sawhorse Projection formulae and their interconversions; Geometrical isomerism: cis-trans and, syn-anti isomerism E/Z notations with C.I.P rules. Relative and absolute configuration: D/L and R/S designations.   | <b>12 Hours</b>   |
| <b>Unit-3:</b>                  | <b>Chemistry of Aliphatic Hydrocarbons Carbon-Carbon sigma bonds</b> Chemistry of alkanes: Formation of alkanes, Wurtz Reaction, Wurtz- Fittig Reactions, Free radical substitutions: Halogenation - relative reactivity and selectivity.   | <b>10 Hours</b>   |
| <b>Unit-4:</b>                  | <b>Carbon-Carbon pi bonds:</b> Formation of alkenes and alkynes by elimination reactions, Mechanism of E1, E2, reactions. Saytzeff eliminations. Reactions of alkenes: Electrophilic additions, their mechanisms (Markownikoff/ Anti Markownikoff addition), mechanism of oxymercuration-demercuration, hydroboration- oxidation, ozonolysis, reduction (catalytic and chemical), syn and anti hydroxylation (oxidation).   | <b>10 Hours</b>   |
| <b>Unit-5:</b>                  | <b>Aromatic Hydrocarbons:</b> Aromaticity: Huckel's rule, aromatic character of arenes, cyclic carbocations/carbanions and heterocyclic compounds with suitable examples. Electrophilic aromatic substitution: halogenation, nitration, sulphonation and Friedel-Craft's alkylation/acylation with their mechanism. Directing effects of the groups.  | <b>10 Hours</b>   |
| <b>Text Books:</b>              | 1.Morrison, R. N. & Boyd, R. N. <i>Organic Chemistry</i> , Dorling Kindersley (India) Pvt. Ltd. (Pearson Education).  |                   |
| <b>Reference Books:</b>         | 1. Finar, I. L. <i>Organic Chemistry (Volume 2: Stereochemistry and the Chemistry of Natural Products)</i> , Dorling Kindersley (India) Pvt. Ltd. |---------------------------------|--|-----------------|-------------------|
| <b>Course Outcomes:</b>         | At the end of this course, the students will be-   |                 |                   |
| <b>CO1.</b>                     | Understanding the concepts of ray and wave optics.   |                 |                   |
| <b>CO2.</b>                     | Applying different laws and concepts of understand optic instruments like grating, telescope etc.  |                 |                   |
| <b>CO3.</b>                     | Analyzing the applications of interference and diffraction and polarization of light waves.  |                 |                   |
| <b>Course Content:</b>          |  |                 |                   |
| <b>Unit-1:</b>                  | <b>Geometrical Optics:</b> Fermat's Principle, General theory of Image formation: Cardinal points of an optical system, general relationship, thick lens, combination of two thin lenses, nodal slide and Newton's formula, Huygens and Ramsden's eyepieces.   | <b>12 Hours</b> |                   |
| <b>Unit-2:</b>                  | <b>Physical Optics I:</b> Interference of Light: The principle of super position, two slide interferences, coherence requirement of the sources, optical path retardation, lateral shift of fringes, Thin films, application for precision measurement for displacements. Interference in thin films, Newton's ring, its application in determination of wave length, refractive index of liquid.  | <b>10 Hours</b> |                   |
| <b>Unit-3:</b>                  | <b>Physical Optics-II Interference.</b> Michelson interferometer: Its application for a precision determination of wave length, wave length deference refractive index of thin transparent film and width of spectral lines. Intensity distribution in multiple bean interference, Fabry - Perot interferometer & elaton. Rayleigh refractometer and other applications.   | <b>10 Hours</b> |                   |
| <b>Unit-4:</b>                  | <b>Physical Optics-III Diffraction.</b> Diffraction of Light: Fresnel diffraction, intensity due to cylindrical wavefront by Fresnel half period method, zone plate, Diffraction at straight edge. Fraunhofer Diffraction: Diffraction at a slit, Diffraction at N-parallel slits, its intensity distribution, plane diffraction grating, Resolution of images, Rayleigh criterion, resolving power of grating, telescope.   | <b>12 Hours</b> |                   |
| <b>Unit-5:</b>                  | <b>Physical Optics-IV Polarization.</b> Double refraction and Optical Rotation: Refraction in uniaxial crystal, its electromagnetic theory, Phase retardation, Quarter wave plate and half wave plate, Rotation of plane of polarization. Fresnel explanation of rotation.   | <b>8 Hours</b>  |                   |
| <b>Text Books:</b>              | Optics by AjoyGhatak, Tata Mc Graw Hill.   |                 |                   |
| <b>Reference Books:</b>         | Engineering Physics by V S Yadav, Tata Mc Graw Hill.<br><b>* Latest editions of all the suggested books are recommended.</b>   |                 |                   |

|                  |   |
|------------------|---|
| Course Outcomes: | <b>At the end of this course, the students will be-</b> |
|------------------|---|

|      |   |
|------|---|
| CO1. | Applying elementary ideas of interference and diffraction to determine the wavelength by Newton's rings, Fresnel's biprism and polarimeter. |
|------|---|

|      |   |
|------|---|
| CO2. | Analyzing the applications and working of Laser, telescope, photocell and Interferometer. |
|------|---|

Course Content:

**LIST OF EXPERIMENT**

Note: Select any ten experiments from the following list

1. To determine the wavelength of Sodium light by Newton's rings.
2. To determine the wavelength of Sodium light by Fresnel's biprism.
3. To determine the specific rotation of the cane sugar solution with the help of Polarimeter.
4. To determine the resolving power and dispersive power by a prism.
5. To determine the resolving power of grating.
6. To study the elliptically polarised light.
7. To determine slit width using He-Ne laser.
8. To determine the Flashing & Quenching of Neon bulb.
9. To determine the Resolving power of a telescope
10. To determine the wavelength of the sodium lamp by Michelson interferometer.
11. To study characteristics of Photo-cell.
12. Familiar with Schuster's focusing, determination of angle of Prism.

**Evaluation Scheme of Practical Examination:**

Internal Evaluation (50 marks) Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

Evaluation scheme:

| PRACTICAL PERFORMANCE & VIVA<br>DURING THE SEMESTER (35 MARKS) |                         |                    |                          | ON THE DAY OF EXAM<br>(15 MARKS) |                    | TOTAL                  |
|--|-------------------------|--------------------|--------------------------|----------------------------------|--------------------|------------------------|

|---------------------------------|--|-------------------|

**Course Outcomes:** At the end of this course, the students will be-

**CO1.** Demonstrating the general characters, floral formula, floral diagram and economic importance of different families of flowering plant.

**CO2.** Analyzing the Bentham & Hooker's system of classification in systematic study of local flora.

**CO3.** Developing the structure of anther, plant embryo.

**Course Content:**

**LIST OF EXPERIMENTS**

1. Systematic study of locally available plants belonging to the families prescribed in theory syllabus.
2. Demonstration of herbarium techniques.
3. Structure of pollen grains using whole mounts (*Catharanthus, Hibiscus, Acacia, Grass*).
4. Demonstration of Pollen viability test using *in-vitro* germination (*Catharanthus*).
5. Study of ovule types and developmental stages of embryo sac using permanent slides /Photographs.
6. Structure of endosperm (nuclear and cellular); Developmental stages of dicot and monocot Embryos using permanent slides /Photographs
7. Isolation and mounting of embryo (using *Symopsis / Senna / Crotalaria*)
8. Field visits. Study of local flora and submission of Field Note Book.

**Study of Specimens**

**Urochordata**– Herdmania, salpa, doliolum

**Cephalochordata**– Amphioxus

**Cyclostomata** –petromyzon, myxine

**Pisces** –Pristis, torpedo, notopterus, exocoetus, clarius, ophiocephalus, catla, rohu, mrigal

**Amphibia**– Ichthyophis, bufo, salamander, uraeotyphlus, necturus, hyla, rhacophorus

**Study of permanent slide**

Balanoglossus sections through proboscis, collar, branchiogenital and hepatic region

**Amphioxus** – oral hood, whole mount section through pharyngea, intestinal & caudal region,

Temporary unstained preparation of placoid, cycloid and ctenoid scales

**Evaluation Scheme of Practical Examination:**

Internal Evaluation (50 marks) Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

**Evaluation scheme:**

| PRACTICAL PERFORMANCE & VIVA<br>DURING THE SEMESTER (35 MARKS) |               |               |            | ON THE DAY OF EXAM<br>(15 MARKS) |               | TOTAL      |
|--|---------------|---------------|------------|----------------------------------|---------------|------------|
| EXPERIMENT   | FILE<br>WORK  | VIVA          | ATTENDANCE | EXPERIMENT                       | VIVA          | INTERNAL   |
| (05 MARKS)   | (10<br>MARKS) | (10<br>MARKS) | (10 MARKS) | (05 MARKS)                       | (10<br>MARKS) | (50 MARKS) |

**External Evaluation (50 marks)**

The external evaluation would also be done by the external Examiner based on the experiment conducted during the examination.

| Experiment | File work  | Viva       | Total      |
|------------|------------|------------|------------|
| (20 MARKS) | (10 MARKS) | (20 MARKS) | (50 MARKS) |

\* **Latest editions of all the suggested books are recommended.**

Definite integration (Miscellaneous Examples), integration as the limit of sum, Reduction Formula.

| <b>Course Code:</b><br>BSCEIE403 | <b>Academic Enhancement Compulsory Course</b><br><b>B.Sc.-B.Ed.(Int.) Semester-IV</b><br><b>Computer Fundamentals, Internet &amp; MS-Office</b>  | L-3<br>P-2<br>C-4 |
| <b>Course Outcomes:</b>          | At the end of this course, the students will be-   |                   |
| <b>CO1.</b>                      | Understand the fundamental hardware components that make up a computer's hardware and the role of each of these components   |                   |
| <b>CO2.</b>                      | Applying the concept of operating system, application program, and what each is used for in a computer.  |                   |
| <b>CO3.</b>                      | Accomplishing creating basic documents, worksheets, presentations with their properties.   |                   |
| <b>Course Content:</b>           |  |                   |
| <b>Unit-1:</b>                   | <b>Introduction and Definition of Computer:</b> Computer Generation, Characteristics of Computer, Advantages and Limitations of a computer, Classification of computers, Functional components of a computer system (Input, CPU, Storage and Output Unit), Types of memory (Primary and Secondary) Memory Hierarchy. Hardware: a) Input Devices- Keyboard, Mouse, Scanner, Bar Code Reader b) Output Devices – Visual Display Unit (VDU), Printers, Plotters etc. Software: Introduction, types of software with examples, Introduction to languages, Compiler, Interpreter and Assembler. Number System: Decimal, Octal, Binary and Hexadecimal Conversions, BCD, ASCII and EBCDIC Codes. | <b>12 Hours</b>   |
| <b>Unit-2:</b>                   | <b>MS – DOS:</b> Getting Started on DOS with Booting the System, Internal Commands: CHDIR(CD),CLS, COPY, DATE, DEL(ERASE), DIR, CHARACTER, EXIT,MKDIR(MD), REM, RENAME(REN), RMDIR(RD), TIME, TYPE, VER, VOL, External Commands: ATTRIB, CHKDSK, COMMAND, DOSKEY, EDIT, FORMAT,HELP, LABEL, MORE, REPLACE, RESTORE, SORT, TREE, UNDELETE, UNFORMAT,XCOPY.<br><b>Introduction of Internet:</b> History of internet, Web Browsers, Searching and Surfing, creating an E-Mail account, sending and receiving E-Mails.   | <b>12 Hours</b>   |
| <b>Unit-3:</b>                   | <b>MS Word:</b> Starting MS WORD, Creating and formatting a document, changing fonts and point size, Table Creation and operations, Autocorrect, Auto text, spell Check, Word Art, inserting objects, Page setup, Page Preview, Printing a document, Mail Merge.   | <b>10 Hours</b>   |
| <b>Unit-4:</b>                   | <b>MS Excel:</b> Starting Excel, Work sheet, cell inserting Data into Rows/ Columns, Alignment, Text wrapping,Sorting data, Auto Sum, Use of functions, Cell Referencing form,generating graphs, Worksheet data and charts with WORD, Creating Hyperlink to a WORD document, Page set up, Print Preview, Printing Worksheets.  | <b>10 Hours</b>   |
| <b>Unit-5:</b>                   | <b>MS Power Point:</b> Starting MS–Power Point, creating a presentation using auto content Wizard, Blank Presentation, creating, saving and printing a presentation, adding a slide to presentation, navigating through a presentation, slide sorter, slide show, editing slides, Using Clipart, Word art gallery, Adding Transition and Animation effects, setting timings for slide show, preparing note pages, preparing audience handouts, printing presentation documents. MS – Access: creating table and database. pages, preparing audience handouts, printing presentation documents.   | <b>10 Hours</b>   |
| <b>Text Books:</b>               | 1. Sinha P.K., Computer Fundamentals, BPB Publishing.  |                   |
| <b>Reference Books:</b>          | 1. Peter Norton_s, Introductions to Computers, Tata McGraw Hill.<br>2. Price Michael, Office in Easy Steps, TMH Publication.<br><b>*Latest editions of all the suggested books are recommended.</b>  |                   |
| <b>E-Resources:</b>              | <a href="https://www.youtube.com/watch?v=-AP1nNK3bRs&amp;list=PLWPirh4EWFpF_2T13UeEgZWZHc8nHBuXp">https://www.youtube.com/watch?v=-AP1nNK3bRs&amp;list=PLWPirh4EWFpF_2T13UeEgZWZHc8nHBuXp</a><br><a href="https://www.youtube.com/watch?v=ME_F9yypzsw">https://www.youtube.com/watch?v=ME_F9yypzsw</a><br><a href="https://www.youtube.com/watch?v=Ko-RvwM2ADw&amp;list=PL7WYUFDtCahBmV4m67WthsiIBbsuEhY3K">https://www.youtube.com/watch?v=Ko-RvwM2ADw&amp;list=PL7WYUFDtCahBmV4m67WthsiIBbsuEhY3K</a><br><a href="https://www.youtube.com/watch?v=ZDnl-0xPuQs&amp;list=PL5BEE99D00E1503DA">https://www.youtube.com/watch?v=ZDnl-0xPuQs&amp;list=PL5BEE99D00E1503DA</a>                   |                   |

| <b>Course Code:</b><br>BSCEI404 | <b>Discipline Specific Courses</b><br>B.Sc.-B.Ed.(Int.) Semester-IV<br><b>OSCILLATIONS AND WAVE</b>  | L-4<br>P-0<br>C-4 |
|---------------------------------|--|-------------------|
| <b>Course Outcomes:</b>         | At the end of this course, the students will be-   |                   |
| <b>CO1.</b>                     | Understanding the concepts and idea of geometrical oscillations including the wave motion.   |                   |
| <b>CO2.</b>                     | Applying the properties of simple harmonic motion.   |                   |
| <b>CO3.</b>                     | Analyzing the applications of SHM like pendulum & Mass spring System.  |                   |
| <b>Course Content:</b>          |  |                   |
| <b>Unit-1:</b>                  | <b>Oscillations SHM:</b><br>Simple Harmonic Oscillations. Differential Equation of SHM and its Solution. Amplitude, Frequency, Time Period and Phase. Velocity and Acceleration. Kinetic, Potential and Total Energy and their Time Average Values. Reference Circle. Rotating Vector Representation of SHM.   | <b>10 Hours</b>   |
| <b>Unit-2:</b>                  | <b>Free Oscillations of Systems with One Degree of Freedom:</b><br>(1) Mass-Spring system, (2) Simple Pendulum, (3) Torsional Pendulum, (4) Oscillations in a U-Tube, (5) Compound pendulum: Centres of Percussion and Oscillation   | <b>12 Hours</b>   |
| <b>Unit-3:</b>                  | <b>Superposition of Two Collinear Harmonic Oscillations :-</b><br>Linearity and Superposition Principle. (1) Oscillations having Equal Frequencies and (2) Oscillations having Different Frequencies. Superposition of Two Mutually Perpendicular Simple Harmonic Motions with Frequency Ratios 1:1 and 1:2.   | <b>10 Hours</b>   |
| <b>Unit-4:</b>                  | <b>System with Two Degrees of Freedom :</b><br>Free Oscillations. Damped Oscillations, Forced oscillation, Transient and Steady States, Amplitude, Phase, Resonance, Power Dissipation and Quality Factor. Coupled Oscillators. Normal Coordinates and Normal Modes.   | <b>8 Hours</b>    |
| <b>Unit-5:</b>                  | <b>Wave Motion:</b><br>Longitudinal and Transverse Wave Equation. Particle and Wave Velocities. Velocity of Transverse Vibrations of Stretched Strings. Velocity of Longitudinal Waves in a Fluid in a Pipe. Newton's Formula for Velocity of Sound. Laplace's Correction.   | <b>10 Hours</b>   |
| <b>Text Books:</b>              | 1- Vibrations and Waves by A. P. French.(CBS Pub. & Dist., 1987)   |                   |
| <b>Reference Books:</b>         | 1- An Introduction to Mechanics by Daniel Kleppner, Robert J. Kolenkow (McGraw-Hill, 1973).<br>2- Waves: BERKELEY PHYSICS COURSE (SIE) by Franks Crawford (Tata McGraw-Hill, 2007).<br>2- .The Physics of Waves and Oscillations by N.K. Bajaj (Tata McGraw-Hill, 1988)<br>3- Fundamentals of Waves & Oscillations By K. Uno Ingard (Cambridge University Press, 1988) .<br><b>* Latest editions of all the suggested books are recommended.</b>   |                   |

| <b>Course Code:</b><br>BSCEI405 | <b>Discipline Specific Courses</b><br><b>B.Sc.-B.Ed.(Int.) Semester-IV</b><br><b>COMPLEX ANALYSIS</b>  |                 | L-4<br>P-0<br>C-4 |
|---------------------------------|--|-----------------|-------------------|
| <b>Course Outcomes:</b>         | At the end of this course, the students will be-   |                 |                   |
| <b>CO1.</b>                     | Understanding the concepts of complex analysis, analytic function and complex integration.   |                 |                   |
| <b>CO2.</b>                     | Applying the Taylor's theorem, Laurent's theorem and Liouville's theorem.  |                 |                   |
| <b>CO3.</b>                     | Analyzing zero's and singularity of a complex function.  |                 |                   |
| <b>Course Content:</b>          |  |                 |                   |
| <b>Unit-1:</b>                  | Analytic functions, conjugate function, Harmonic function, N.S.C. for Cauchy Remann equations, construct conjugate analytic functions.   | <b>10 Hours</b> |                   |
| <b>Unit-2:</b>                  | Complex Integration, Complex line integral, Cauchy integral function, Poisson integral, Liouville's theorem Taylor theorem, Laurent's theorem.   | <b>12 Hours</b> |                   |
| <b>Unit-3:</b>                  | Zero's & Singularity, Zero's of a function, singular point, poles and different types of singularities, limiting point of zero's and poles, Weierstrass theorem  | <b>10 Hours</b> |                   |
| <b>Unit-4:</b>                  | The Calculus of Residue, Residue of a pole at infinity Residue theorem Integration around $\int_{-\infty}^{\infty} f(z) dz$ unit circle, evaluation of integral .  | <b>10 Hours</b> |                   |
| <b>Unit-5:</b>                  | Conformal mappings, transformation $w = z^2$ , $w = z^{1/2}$ , $z = c \sin w$  | <b>10 Hours</b> |                   |
| <b>Text Books:</b>              | 1. "Complex Variable" by T Pati, Pothishala Pvt Ltd  |                 |                   |
| <b>Reference Books:</b>         | 1. "Complex Variable" by L. V. Ahlfors, Mc-GrawHill&Co,<br>2. "Complex Variable" by R. K. Gupta, R. V. Churchill and J. W. Brown, Mc-GrawHill&Co,<br>3. Complex Variable by Shanti Narayan, S.Chand&Company<br>4. "Complex Variable" by J. K. Goyal and K. P. Gupta, Pragati Prakashan<br>5. "Complex Variable" by J. C. Chaturvedi and S.S. Seth, Student Friends & Co.<br><b>* Latest editions of all the suggested books are recommended.</b> |                 |                   |

| <b>Course Code:</b><br>BSCEI406 | <b>Discipline Specific Courses</b><br><b>B.Sc.-B.Ed.(Int.) Semester-IV</b><br><b>PLANT PHYSIOLOGY AND METABOLISM</b>  | L-4<br>P-0<br>C-4 |
|---------------------------------|---|-------------------|
| <b>Course Outcomes:</b>         | <b>At the end of this course, the students will be-</b>   |                   |
| <b>CO1.</b>                     | Understanding the concepts, aim and scope of Plant Physiology.  |                   |
| <b>CO2.</b>                     | Applying the properties and importance of water in plant metabolism   |                   |
| <b>CO3.</b>                     | Demonstrating the basic concept of mineral nutrition, photosynthesis and respiration in plants.   |                   |
| <b>CO4.</b>                     | Describing the role of enzymes in plant metabolic activities.   |                   |
| <b>Course Content:</b>          |   |                   |
| <b>Unit-1:</b>                  | <b>Plant-water relations</b><br>Importance of water, water potential and its components; Transpiration and its significance; Factors affecting transpiration; Root pressure and guttation.  | <b>08 Hours</b>   |
| <b>Unit-2:</b>                  | <b>Mineral nutrition and Translocation</b><br>Essential elements, macro and micronutrients; Criteria of essentiality of elements; Role of essential elements, Transport of ions across cell membrane, active and passive transport, carriers, channels and pumps.<br>Translocation in phloem. : Composition of phloem sap, girdling experiment; Pressure flow model; Phloem loading and unloading.  | <b>12 Hours</b>   |
| <b>Unit-3:</b>                  | <b>Photosynthesis and Respiration</b><br>Photosynthetic Pigments (Chl a, b, xanthophylls, carotene); Photosystem I and II, reaction center, antenna molecules; Electron transport and mechanism of ATP synthesis; C3, C4 and CAM pathways of carbon fixation.<br>Respiration: glycolysis, anaerobic respiration, TCA cycle; Oxidative phosphorylation.  | <b>10 Hours</b>   |
| <b>Unit-4:</b>                  | <b>Enzymes and Nitrogen metabolism:</b><br>Structure and properties; Mechanism of enzyme catalysis and enzyme inhibition. Nitrogen metabolism : Biological nitrogen fixation; Nitrate and ammonia assimilation.   | <b>8 Hours</b>    |
| <b>Unit-5:</b>                  | <b>Plant growth regulators and Plant response to light and temperature</b><br>Discovery and physiological roles of auxins, gibberellins, cytokinins, ABA, ethylene.<br>Plant response to light and temperature: Photoperiodism (SDP, LDP, Day neutral plants); Phytochrome (discovery and structure), red and far red light responses on photomorphogenesis; Vernalization  | <b>10 Hours</b>   |
| <b>Text Books:</b>              | 1. Hopkins, W.G., Huner, N.P., (2009). Introduction to Plant Physiology. John Wiley & Sons, U.S.A. 4th Edition.   |                   |
| <b>Reference Books:</b>         | Taiz, L., Zeiger, E., Møller, I.M. and Murphy, A (2015). Plant Physiology and Development. Sinauer Associates Inc. USA. 6th edition.<br>Bajracharya, D., (1999). Experiments in Plant Physiology- A Laboratory Manual. Narosa Publishing House, New Delhi.<br><b>* Latest editions of all the suggested books are recommended.</b>  |                   |

|-------------------------|---|
| <b>Course Outcomes:</b> | <b>At the end of this course, the students will be-</b> |
|-------------------------|---|

|             |   |
|-------------|---|
| <b>CO1.</b> | Applying elementary ideas of oscillation and wave motion to determine the gravitational constant, spring constant and AC frequency. |
|-------------|---|

|             |   |
|-------------|---|
| <b>CO2.</b> | Analyzing the applications and working of Lissajous figures, oscillators and CRO. |
|-------------|---|

**Course Content:**

**LIST OF EXPERIMENT**

**Note: Select any ten experiments from the following list**

1. To determine acceleration due to gravity (g) by Bar Pendulum.
2. To determine acceleration due to gravity (g) by Kater's Pendulum.
3. To study the Motion of a Spring and calculate (a) Spring Constant (b) acceleration due to gravity and (c) Modulus of Rigidity
4. To determine the Frequency of an Electrically Maintained Tuning Fork by Melde's experiment
5. To determine frequency of A.C. mains by mean of sonometer.
6. To determine the motion of coupled oscillator.
7. To determine frequency of A.C. mains by electric vibrator.
8. To study Lissajous figures.
9. To study AF and RF oscillator.
10. To study simple harmonic motion of a body.
11. To determine gravity (g) and velocity of freely falling body using digital technique.
12. To determine the wave form, voltage and frequency of a given signal using C.R.O.

**Evaluation Scheme of Practical Examination:**

Internal Evaluation (50 marks) Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

**Evaluation scheme:**

| PRACTICAL PERFORMANCE & VIVA DURING THE SEMESTER (35 MARKS) |            |            |            | ON THE DAY OF EXAM (15 MARKS) |            | TOTAL      |
|---|------------|------------|------------|-------------------------------|------------|------------|
| EXPERIMENT  | FILE WORK  | VIVA       | ATTENDANCE | EXPERIMENT                    | VIVA       | INTERNAL   |
| (05 MARKS)  | (10 MARKS) | (10 MARKS) | (10 MARKS) | (05 MARKS)                    | (10 MARKS) | (50 MARKS) |

**External Evaluation (50 marks)**

The external evaluation would also be done by the external Examiner based on the experiment conducted during the examination.

| Experiment | File work  | Viva       | Total      |
|------------|------------|------------|------------|
| (20 MARKS) | (10 MARKS) | (20 MARKS) | (50 MARKS) |

**Course Outcomes:** At the end of this course, the students will be-

|             |  |
|-------------|--|
| <b>CO1.</b> | Applying the knowledge of preparation of different types of solutions                          |
| <b>CO2.</b> | Analyzing the techniques of chromatography in separation and identification of plant pigments. |
| <b>CO3.</b> | Demonstrating the role of external and internal factors in plant growth and development        |

**Course Content:**

**LIST OF EXPERIMENTS**

1. Determination of osmotic potential of plant cell sap by plasmolytic method.
2. To study the effect of two environmental factors (light and wind) on transpiration by excised twig.
3. Calculation of stomatal index and stomatal frequency of a mesophyte and a xerophyte.
4. Demonstration of Hill reaction.
5. Demonstrate the activity of catalase and study the effect of pH and enzyme concentration.
6. To study the effect of light intensity and bicarbonate concentration on O<sub>2</sub> evolution in photosynthesis.
7. Comparison of the rate of respiration in any two parts of a plant.
8. Separation of amino acids by paper chromatography.

**Evaluation Scheme of Practical Examination:**

Internal Evaluation (50 marks) Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

### LIST OF EXPERIMENTS

- 1- **Reptiles** – study of chameleon, varanus, pharynosoma, draco, tortoise, cobra, krait, russel's, viper, sea snake testuda,
- 2- Hemidactylus, uromastix, ophiosaurus, hydrophis, crocodiles
- 3- **Birds** – study of owl, woodpecker, king fisher, kite, duck, parrot, study of dozen birds of delhi
- 4- **Mammals** – study of squirrel, mangoose, bat, loris, rabbit,

### Development biology

- 1- **Frog**- study of developmental stage w.m & section through permanent slides cleavage, stage, blastula, gastrula, neurula tadpole
- 2- **Chick** – study of developmental stage primitive streak, - 21h, 24h, 28h, 33h, 36h, 48h, 72h.
- 3- Section of testis and ovary (mammalian)
- 4- Slides of mammalian sperm and ovum

### Evaluation Scheme of Practical Examination:

Internal Evaluation (50 marks) Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

| CO1.                     | Understanding the concepts of physical and Inorganic chemistry.  |          |                   |
| CO2.                     | Analyzing the different environmental problems.  |          |                   |
| CO3.                     | Evaluating the chemistry of various type of substances.  |          |                   |
| <b>Course Content:</b>   |  |          |                   |
| Unit-1:                  | Specific Conductance, Equivalent Conductance, Kohlrausch's law, Arrhenius Theory of electrolyte dissociation & Limitations, Oswald's dilution law, Debye Huckel – onsagar <sup>S</sup> equation $\text{Seq}^n$ for Strong. Electrolyte, Definition of Transport Number, Determination by Hittorf's Method.   | 10 Hours |                   |
| Unit-2:                  | <b>Thermodynamics</b><br>Types of System, Intensive and Extensive Properties, Zeroth Law & First Law of thermodynamics, Enthalpy & Internal Energy (def), Heat capabilities & their relationship, Second Law of Thermodynamics, Concept of entropy, Entropy Change during Phase transitions, Carnot cycle & its efficiency, Gibbs free energy, Joule thomson effect.   | 12 Hours |                   |
| Unit-3:                  | <b>Ionic Equilibria</b><br>Strong, moderate weak electrolytes, Degree of Ionization, Ionization Constant, Ionic product of water, Common ion effect, PH Scale, Salt Hydrolysis, Calculation of hydrolysis Constant. and degree of hydrolysis, Buffer solution, Buffer Action, Solubility Product of Sparingly Soluble salt, application of Solubility product.   | 10 Hours |                   |
| Unit-4:                  | <b>Environmental Chemistry</b><br>Importance of environment now-a-days, Natural resources (Renewable Resources), Non renewable resources, Photochemical Smog, Biological Oxygen demand, COD, Pesticides & its Biochemical effects, toxicity of Lead, Mercury, arsenic & cadmium..  | 8 Hours  |                   |
| Unit-5:                  | <b>Coordination Chemistry</b><br>IUPAC Nomenclature, Werner's Theory, Valence bond Theory, Crystal field theory, Isomerism in coordinate compounds (structural and stereo Isomerism), Importance of co-ordination compounds.   | 10 Hours |                   |
| <b>Text Books:</b>       | . Inorganic Chemistry Gurtu & Khera Pragati Prakashan.<br>Physical Chemistry Gurtu & Khera Pragati Prakashan.  |          |                   |

|----------------------------------|---|--|
| <b>Course Outcomes:</b>          | <b>At the end of this course, the students will be-</b>   |  |
| <b>CO1.</b>                      | Understanding various approaches, methods, theories, principles and evaluation techniques of pedagogy of Mathematics.   |  |
| <b>CO2.</b>                      | Applying the principles, theories, procedures for curriculum design, unit plans, learning plans, and evaluation techniques of pedagogy of Mathematics.  |  |
| <b>CO3.</b>                      | Analyzing the concepts and correlation of Mathematics in interdisciplinary situations.  |  |
| <b>CO4.</b>                      | Evaluating the learning assessment requirements and designing pedagogical assessment tools for teaching and learning of Mathematics.  |  |
| <b>Course Content:</b>           |   |  |
| <b>Unit-1:</b>                   | <ul style="list-style-type: none"> <li>• Meaning and nature of mathematics, Uses and significance of Mathematics</li> <li>• Contribution of Indian Mathematician –AryaBhatt, Brahmagupta, Bhaskarachrya and Ramanujam.</li> <li>• Contribution of Foreign Mathematician- Euclid, Pythagoras and Rene-Descartes.</li> <li>• Aims and objectives of teaching of Mathematics at secondary and higher secondary school stage.</li> <li>• Objectives of teaching mathematics in terms of behavioral outcomes.</li> </ul>   | <b>12<br/>Hours</b>                    |
| <b>Unit-2:</b>                   | <ul style="list-style-type: none"> <li>• Methods: inductive – deductive, analytic – synthetic, problem solving, heuristic, project, laboratory.</li> <li>• Techniques: oral, written, drill, assignment, supervised study, programmed learning, Cooperative learning, Brain storming and concept mapping.</li> <li>• Innovative instructional method: Micro Teaching</li> </ul>   | <b>09<br/>Hours</b>                    |
| <b>Unit-3:</b>                   | <ul style="list-style-type: none"> <li>• Meaning and Importance of lesson plan</li> <li>• Performa of lesson plan (Herbart, Bloom, RCEM and NCERT approaches) and its rationale for unit plan and year plan.</li> <li>• Developing/preparing low cost improvised teaching aids, relevant to local ethos.</li> <li>• Skill in maintaining and using black board, models, charts, T.V. films, video tapes and VCR.</li> <li>• Application of computer in teaching of Mathematics, CAI</li> </ul>  | <b>12<br/>Hours</b>                    |
| <b>Unit-4:</b>                   | <ul style="list-style-type: none"> <li>• Principles and rational of curriculum development, Organizing the syllabi both logically and psychologically according the age groups of children.</li> <li>• Planning activities and methods of developing the substitute/ alternative material to the prescribed for completing the syllabi, Organization of library.</li> <li>• Text book in mathematics – qualities of a good text book in mathematics.</li> <li>• Using Mathematics as a game for recreation; organizing quiz programmers, skill-development in answering puzzles riddles, magic squares, word search etc.</li> <li>• Learning about the short cuts mentioned in Vedic mathematics Development of math's laboratory, Maths Club.</li> </ul> | <b>08<br/>Hours</b>                    |
| <b>Unit-5:</b>                   | <ul style="list-style-type: none"> <li>• Evaluation in mathematics in terms of cognitive, affective and psychomotor behavioral development.</li> <li>• Need of Evaluation.</li> <li>• Comprehensive and continuous evaluation (C.C.E.) in Mathematics.</li> <li>• Development of test item (short answer and objective type).</li> <li>• Diagnostic testing and remedial teaching.</li> </ul>   | <b>10<br/>Hours</b>                    |
| <b>Text Books:</b>               | <ul style="list-style-type: none"> <li>• Davis, D.R. The teaching of mathematics', Addition Wesley press, London.</li> <li>• Fexmont and Herbert; 'How to teach Mathematics in secondary school', w.b.saurders company, London.</li> </ul>  |  |

|   | Internal Evaluation (50 marks) Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.   |                    |                          |                                  |  |                          |  |                    |                     |  |                                  |  |       |                          |                         |                    |                          |                          |                    |                        |  |  |  |  |  |  |

| <b>Course Content:</b>   |   |                 |                   |
| <b>Unit-1:</b>           | <b>Kinetic Theory of Gases:</b> Maxwell's speed distribution, Mean free path, flow and Thermal conduction in gases. Real gases, Andrew's curves, Equation of state, Van der Waals equation, JouleThomson effect, Inversion temperature, Thermodynamic equations for a Van der Waals gas.  | <b>10 Hours</b> |                   |
| <b>Unit-2:</b>           | <b>Thermodynamics:</b> Reversible and irreversible processes, Carnot's cycle and Carnot's theorem. Second law of thermodynamics, Thermodynamic scale of temperature. Concept of entropy, Entropy change in reversible and irreversible processes. Entropy and disorder, Principle of increase of entropy, Entropy and unavailable energy, Entropy as a thermodynamic variable, S-T diagram.   | <b>12 Hours</b> |                   |
| <b>Unit-3:</b>           | <b>Maxwell's Thermodynamics Equations and Radiation:</b> Maxwell's thermodynamical equations and their applications, Energy and heat capacity equations Clapeyron equations, The blackbody spectrum, Wien's displacement law, Rayleigh-Jean's law, Planck's quantum theory of radiation.  | <b>10 Hours</b> |                   |
| <b>Unit-4:</b>           | <b>Some Systems at Low Temperatures:</b> Low temperature technique, liquified gases, Superfluidity in He II, Bose-Einstein Condensation in atomic clouds. Superconductivity, Soft and Hard superconductors, Specific Heat and energy band gap for superconductors, Applications and Examples of superconductors. Liquefaction of H <sub>2</sub> and He, Solidification of He. Liquid He II, Adiabatic demagnetization, Low temperature thermometry.   | <b>12 Hours</b> |                   |
| <b>Unit-5:</b>           | <b>Statistical Mechanics:</b> Probability and thermodynamic probability, principle of equal a prior probabilities, probability distribution and its narrowing with increase in number of particles. . The expressions for average properties. Constraints; accessible and inaccessible states, distribution of particles with a given total energy into a discrete set of energy states.  | <b>10 Hours</b> |                   |
| <b>Text Books:</b>       | 1. Corbett Jenny- Supporting inclusive Education, Routledge falmer, 2001  |                 |                   |

|--------------------------|--|-----------------|-------------------|
| <b>Course Outcomes:</b>  | At the end of this course, the students will be-   |                 |                   |
| <b>CO1.</b>              | Understanding the concepts of applied statistics.  |                 |                   |
| <b>CO2.</b>              | Applying the theory of index number.   |                 |                   |
| <b>CO3.</b>              | Analyzing different kind of decision theory, inventory control, CPM & PERT.  |                 |                   |
| <b>Course Content:</b>   |  |                 |                   |
| <b>Unit-1:</b>           | <b>Statistical Quality control:</b> General theory of control charts, causes of variation in quality, control limits, sub-grouping, summary of out of control criteria, charts for attributes np chart, pchart, c chart, Chart for variables X R and sigma charts.   | <b>10 Hours</b> |                   |
| <b>Unit-2:</b>           | <b>Time Series:</b> Introduction, components of time series, models of time series, measurement of Trend-graphic, semi-average, least square and moving average methods, Measures of seasonal variation –Simple average, Ratio to M. A., Ratio to trend, link relative method.   | <b>12 Hours</b> |                   |
| <b>Unit-3:</b>           | <b>Hypothesis Testing:</b> Types of Hypothesis, level of significance, Critical Region, Power of a test, Types of Error, t-test, z-test, Anova.  | <b>10 Hours</b> |                   |
| <b>Unit-4:</b>           | <b>Index Number:</b> Its definition, application of index numbers, price quantity and value relatives, link and chain relatives, problems involved in computation of index numbers, use of averages, simple and weighted aggregative and average methods, Laspeyre's Passche's, Marshall Edgeworth and Fisher's index numbers.   | <b>8 Hours</b>  |                   |
| <b>Unit-5:</b>           | <b>Decision Theory:</b> Different kind of decision theory, inventory control, CPM, PERT.   | <b>08 Hours</b> |                   |
| <b>Text Books:</b>       | 1. "Mathematical Statistics" by S.C. Gupta, S. Chand & co.<br>2. "Operation Research" by D. S. Hira, S. Chand & co.  |                 |                   |
| <b>Reference Books:</b>  | 1. "Operation Research" by Winston, Cengage Learning<br>2. "Operation Research" by H. A. Taha<br>3. "Statistics" by J. N. Kapoor and H. C. Saxena, S.Chand& Company.<br><b>* Latest editions of all the suggested books are recommended.</b>   |                 |                   |

| Course Code:<br>BSCEI606 | Core Courses<br><b>B.Sc.-B.Ed.(Int.) Semester-VI<br/>ENVIRONMENTAL BIOTECHNOLOGY</b>  |                 | L-4<br>P-0<br>C-4 |
|--------------------------|---|-----------------|-------------------|
| <b>Course Outcomes:</b>  | At the end of this course, the students will be-  |                 |                   |
| <b>CO1.</b>              | Understanding the various global and regional environmental issues.   |                 |                   |
| <b>CO2.</b>              | Remembering bio-techniques for monitoring, cleaning up of toxic hazardous substances from the environment.  |                 |                   |
| <b>CO3.</b>              | Explain different types of environmental pollutions and their impacts on diverse forms of life.   |                 |                   |
| <b>CO4.</b>              | Describing the scopes of environmental biotechnology in order to protect the environment.   |                 |                   |
| <b>Course Content:</b>   |   |                 |                   |
| <b>Unit-1:</b>           | <b>Introduction and Scope of Environmental Biotechnology</b><br>Definition, components and scopes of Environmental Biotechnology, Global environmental problems - global warming, ozone depletion, UV-B, greenhouse effect and acid rain, their impact and approaches for management. Environmental pollution - types of pollution, sources of pollution, measurement of pollution, methods of measurement of pollution, bioaccumulation, bioconcentration, biomagnification.   | <b>10 Hours</b> |                   |
| <b>Unit-2:</b>           | <b>Microbiology of waste water treatment and Xenobiotic compounds</b><br>Aerobic process - activated sludge, oxidation ponds, trickling filter, rotating drums, oxidation ditch. Anaerobic process - anaerobic digestion, anaerobic filters, up flow anaerobic sludge blanket reactors. Bioremediation: concept, methods and benefits of bioremediation. Xenobiotic compounds: biodegradation of xenobiotic in environment, degradation of pesticides and hydrocarbons.   | <b>12 Hours</b> |                   |
| <b>Unit-3:</b>           | <b>Role of immobilized cells/enzymes in treatment of toxic compounds</b><br>Bioreactors, bioleaching, biomining, biosensors, biotechniques for air pollution abatement and odour control.   | <b>10 Hours</b> |                   |
| <b>Unit-4:</b>           | <b>Role of Environmental Biotechnology in Sustainable Development</b><br>Basic concept, goals and importance of sustainable development, renewable and non-renewable energy resources, concept of waste and its types, concept of bioenergy and biofuels, Classification of biofuels, biofuels production from organic waste, bioethanol, biodiesel, Biogas, Biofertilisers, Biopesticides,   | <b>10 Hours</b> |                   |
| <b>Unit-5:</b>           | <b>Public Participation for Environmental Protection</b><br>Environmental movement and people's participation with special references to Gandhamardan, Chilika and Narmada Bachao Andolan, Chipko and Silent valley Movement; Women and Environmental Protection, Role of NGO in bringing environmental awareness and education in the society.   | <b>12 Hours</b> |                   |
| <b>Text Books:</b>       | <ul style="list-style-type: none"> <li>Waste water engineering - treatment, disposal and reuse, Metcalf and Eddy Inc., Tata McGraw Hill, New Delhi.</li> </ul>  |                 |                   |

**Course Outcomes:** At the end of this course, the students will be-

|             |   |
|-------------|---|
| <b>CO1.</b> | Applying various laws of thermodynamics to various processes and real systems.              |
| <b>CO2.</b> | Analyzing the working of resistance thermometer, Thermocouple and application of radiation. |

**Course Content:**

**LIST OF EXPERIMENTS**

**Note: Select any ten experiments from the following list**

- 1- To determine J by Callender and Barne's constant flow method.
- 2- To determine the Coefficient of Thermal Conductivity of Copper by Searle's Method.
- 3- To determine the Coefficient of Thermal Conductivity of Copper by Angstrom's Method.
- 4- To determine the Coefficient of Thermal Conductivity of a bad conductor by Lee and Charlton's disc method.
- 5- To determine the Temperature Coefficient of Resistance by Platinum Resistance Thermometer (PRT).
- 6- To calibrate a Resistance Temperature Device (RTD) to measure temperature in a specified range using Null Method/ Off-Balance Bridge with Galvanometer based measurement.
- 7- To study the variation of Thermo-Emf of a Thermocouple with Difference of Temperature of its Two Junctions.
- 8- To Calibrate a Thermocouple to measure Temperature in a Specified Range using Null Method.
- 9- Measurement of Plank's constant using blackbody radiation.
- 10- To determine the value of Boltzmann Constant by studying Forward Characteristics of a Diode.
- 11- To determine the value of Stefan's Constant.

|   |   |                         |                    |                          |                                  |                     |                        |
|---|---|-------------------------|--------------------|--------------------------|----------------------------------|---------------------|------------------------|
| <b>Evaluation</b>   | <b>Evaluation Scheme of Practical Examination:</b>  |                         |                    |                          |                                  |                     |                        |
|   | Internal Evaluation (50 marks) Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file. |                         |                    |                          |                                  |                     |                        |

**Course Content:**

**Practical/Field Engagement :**

This semester shall entail a school internship of 16 weeks where in the 1st week will be exclusively dedicated to observing a regular class room with a regular teacher and would include peer observations, teacher observation. In the next 15 weeks of internship the student teacher shall be engaged in teaching experience. Next 12 weeks (06 weeks for each of the two school subjects) shall be devoted for teaching of subjects lessons with daily lesson plan. 25 lessons each shall be taught at Upper Primary and secondary levels. During next 01 week students shall carry out the duties of concerned subject teacher as per the school time table. Last 02 weeks shall be devoted to post teaching activities. Activities during this period shall be evaluated as follows :

| <b>S.No.</b> | <b>Components</b>   | <b>Internal Marks</b> | <b>External Marks</b> |
|--------------|---|-----------------------|-----------------------|
| <b>1.</b>    | Evaluation based on the observations by Head of the school during teaching practice & pupil teacher participation in school activities. | -                     | <b>50</b>             |
| <b>2.</b>    | PPT Presentation of Internship  | <b>10</b>             | -                     |
| <b>3</b>     | Achievement Test Report (ATR)(In one subject)   | <b>10</b>             | -                     |
| <b>4.</b>    | Case Study  | <b>10</b>             | -                     |
| <b>5.</b>    | Use of Teaching Learning Material   | <b>05</b>             | -                     |
| <b>6.</b>    | Peer Group observation  | <b>05</b>             | -                     |
| <b>7.</b>    | Scout-Gudie Camp  | <b>10</b>             | -                     |
|              | <b>Total</b>  | <b>50</b>             | <b>50</b>             |

| <b>CO.4</b>                            | Developing the ability to write a reflective report that would facilitate to consolidate and reflection teaching experience. |  |

**Course Content:**

Objective of this paper is to assess subjective knowledge, teaching skills and teaching efficiency of the pupil teachers:

**Evaluation of Teaching Skill**

The assessment will be done in two components: Internal 50% and External 50%

- The External assessment shall be done by the external examiner appointed by the controller of examination of university.
- The Internal assessment shall be done by the Faculty Concerned or internal examiner appointed by the principal.
